Java Developer & Web Developer

SUMMARY

Computer Science student with strong foundations in Java programming and Data Structures & Algorithms. Experienced in developing responsive web applications using HTML, CSS, JavaScript, and React, along with building intelligent workflows using LangChain and LangGraph. Passionate about writing clean, efficient code and developing scalable solutions.

EDUCATION

B.Tech in Computer Science and Engineering

2023 – 2027

CMR College of Engineering and Technology

PROJECTS

VCARE4U — Mental Health Self-Assessment Platform

- Developed a fully responsive web application using HTML, CSS, and JavaScript.
- Implemented condition-based tests, symptom analysis, and wellness recommendations.
- Designed secure authentication system with personalized login functionality.

Multimodal Biometric Recognition System

- Built biometric authentication modules integrating multiple input traits.
- Applied structured algorithmic logic to enhance reliability and accuracy.

Snapcut AI — AI-Powered Web Application

- Built a high-performance web application using React, TypeScript, Tailwind CSS, and Vite with 97% TypeScript coverage for a scalable and type-safe architecture.
- Designed a responsive and modern UI using Tailwind CSS and shadcn/ui to deliver a professional user experience.
- Implemented CI/CD pipelines and deployed the application using Vercel, ensuring reliable performance and uptime.

ACHIEVEMENTS

- Introduction to Data Science — Cisco Networking Academy
- AI Foundation and AI Advanced — Hexart.in

TECHNICAL SKILLS

Programming Languages: Java, Python, C

Web Development: HTML, CSS, JavaScript, React, FastAPI

AI/ML: Data Preprocessing, Basic ML Concepts

Libraries: NumPy, pandas

Frameworks: LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Agentic AI

Core Skills: Data Structures and Algorithms, OOPS

Databases: MySQL

Tools & Platforms: GitHub, VS Code
